

The Infrastructure Layer for Global Early-Stage Innovation

Pynn helps investor groups, accelerators, incubators, conferences, corporates, governments and innovation programs assess startups, manage dealflow, and connect to a global investment ecosystem – all in one white-label platform.

THE PROBLEM

Running an innovation community today means juggling applications, scoring, CRM, events, member management and portfolio tracking across a patchwork of disconnected tools. Startups get inconsistent evaluation. Investors get a poor experience. Your team wastes hours on admin that should take minutes.

| You're investing in the future, using tools from the past.

THE SOLUTION

Pynn is the purpose-built operating system for innovation communities. One white-label system that handles everything from first startup application to final investment decision, connecting your community to a global network of startups and investors in the process.

Live in 10 minutes. No developer needed.

WHAT PYNN DOES

Assess Faster

AI-powered startup scoring against your investment thesis. Every applicant receives an in-depth assessment report automatically – consistent, bias-free, and done in minutes instead of days.

Manage Everything

Full dealflow CRM with pipeline tracking, stage management, team notes, automated workflows and portfolio management. Your entire operation in one place.

Run Your Community

White-label investor portal, private events management, member directory, and integrated membership fee collection including invoicing.

Grow Smarter

Access a global startup marketplace giving you and your members visibility of assessed startups from across the world, and giving your startups exposure to a rapidly growing international investor network. Co-investment alerts notify you when other Pynn communities invest in startups in your pipeline.

AS OF AUGUST 2026

WHO USES PYYN

WHAT OUR CLIENTS SAY

Guillermo Soto
Pinama Capital 23

"Pynn stimulates innovation across the entire ecosystem. Founders get powerful insights into their projects and a clearer path to raising funds, while investors can make smarter, better-informed decisions. It creates real value on both sides of the table, which is exactly what a platform operating at this level should do."

Carlos Toribio
Ibiza Tech Forum

"Pynn transformed how we run Ibiza Tech Forum. We assessed 300+ applicants through the platform, automatically providing feedback to every one regardless of whether they made the finals. Selecting our top 25 finalists became straightforward, and the assessment reports gave our attending investors real insight into who to meet before the event even started."

Agata Andryszczak
Foundrise

"Pynn has completely changed how we manage deal flow and evaluate startups at Foundrise. What used to take days now takes minutes, the consistency of our assessments has improved, and we've collaborated on in-person events that brought real value to the founders in our community. It's become an essential part of how we operate."

Etienne Gillard
Scale2Miami

"Scale2Miami leverages Pynn to streamline our entire ecosystem workflow. It has fundamentally transformed how we operate, saving us countless hours and significantly reducing administrative overhead."
